Profile Summary

Results-driven Python Developer with 3+ years of experience in designing and developing scalable web applications and data-driven solutions. Skilled in backend development, API design, database management, and building efficient, high-performance systems. Experienced in working across the full software development lifecycle with a strong focus on problem-solving, automation, and system optimization. Passionate about learning new technologies and delivering reliable solutions that improve business efficiency and user experience.

Experience

Flairminds Softwares Pvt. Ltd. | *Python Developer* | June 2023 - Present

- **Automated Financial Portfolios**
 - Architected and led the design of backend services, achieving a 25% reduction in portfolio calculation time and a 20% improvement in data accuracy.
 - Designed and deployed scalable **Flask** APIs using PostgreSQL to enhance accessibility and usability for end-users.
 - Engineered adaptable calculation logic using **Pandas** and **NumPy** to perform simulations, which improved code reusability by over 30%.
 - Directed the implementation of a streamlined **CI/CD pipeline** using GitHub Actions, reducing deployment time by 50% and ensuring seamless updates to Azure App Services.
- **Data Ingestor**
 - Built a scalable ETL pipeline using **Flask**, **PostgreSQL**, and **Azure Blob Storage**, handling multiple data sources and boosting processing speed by 40%.
 - Cleaned and loaded thousands of records into a centralized **PostgreSQL** database, improving data integrity by 25%.
 - Integrated **SerpApi** and **Gemini LLM** model to automate data retrieval, cutting manual effort by 50% and improving accuracy by 45%.
 - Created a **Neo4j** knowledge graph of 1000+ financial institutions enabling complex relationship analysis.
 - Designed normalized PostgreSQL schemas and wrote optimized SQL queries to support high-volume data ingestion.

Key Projects

- **Campaign Performance Intelligence Engine**
 - Built a Campaign Performance Intelligence Engine using Python (Pandas), PostgreSQL, and APIs to unify data and improve ROI through automated recommendations.
 - Developed a RAG-based pipeline integrating FAISS and LLMs to analyze metrics, benchmarks, and past insights for explaining performance issues.
 - Architected a scalable vector search system to automate KPI calculations and root-cause analysis, significantly reducing manual effort and reporting latency.
- **Document Extractor**
 - Engineered an automated data extraction pipeline using Google's Gemini, designing precision prompts to parse unstructured PDF data into a required format.
 - Implemented a Gemini-powered RAG (Retrieval-Augmented Generation) chatbot for intelligent, conversational Q&A on the document content.

Skills

Backend Languages & Frameworks: Python, Flask, Django, Fast Api, SQLAlchemy, Pandas, Numpy, Java.

Databases: Neo4j, PostgreSQL

Frontend: React.js, HTML, CSS, JavaScript.

Generative AI: LLMs, RAG, Prompt Engineering, Vector Databases.

Cloud & DevOps: Azure (App Services, Blob Storage), GitHub Actions, Git, Docker.

Education

M.Sc. Computer Applications (Fergusson College, Pune University)	2021 - 2023
B.Sc. Computer Science (Pune University)	2018 - 2021

Achievements

- Employee of the quarter - Flairminds Softwares Pvt. Ltd
